

## AdiIRC - \$true - # 2

*Added in 1.8.10*

### **\$true**

Returns \$true, mainly used for [/if](#), [/while](#) expressions.

### **Example**

```
if ($true) {  
    echo -ag expression was true  
}  
  
if (!$true) {  
    echo -ag expression was false  
}  
  
if ($false) {  
    echo -ag expression was false  
}  
  
if (!$false) {  
    echo -ag expression was true  
}
```
