

## AdiIRC - Autojoin - # 4

*Added in 1.9.4*

### **/autojoin [-nsdN]**

Can be used in the [on CONNECT](#) event or Perform section to delay or prevent auto joining of channels.

*This also affects the rejoining of open channel windows during a reconnect.*

### **Parameters**

- n - Join now.
- s - Skip autojoin.
- dN - Delay autojoin for N seconds.

### **Example**

```
; Delay autojoin for 5 seconds.  
on *:CONNECT:autojoin -d5
```

```
; Skip autojoin.  
on *:CONNECT:autojoin -s
```
