

# Auto join channels

There are several ways to auto join channels.

## Favorites

For globally joining auto joining channels regardless of how you are connected to the server, click [Menubar](#) -> [Favorites](#) -> Add to favorite and mark the **Join on connect** checkbox.

*Make sure **Enable join on connect** is checked in [Menubar](#) -> [Favorites](#) -> *Organized Favorites*.*

## Serverlist

When connected to a server from the [Serverlist](#), you can add auto joining channels in the [Channels](#) or right-click the channel in the [Treebar/Switchbar](#) then clicking **Add Channel** or by using the [/channels](#) command.

## Quick Connect

When connected through Quick Connect, auto joining channels can be added in [Options](#) -> [Quick Connect](#) or in the [Quick Connect dialog](#).

## /server command

When connected through the [/server](#) command, channels from the [Quick Connect options](#) are used.
