

## AdiIRC - Avoice - # 1

*Added in 3.1*

**/avoice [-lrw] <on|off|nick|address> [#channel1,#channel2,...] [type] [network]**

Add/remove/list users from the auto-voice list.

### Switches

- l - Prints all auto-voice users.
- r - Removes a address from the auto-voice list. (if no address is specified, clears the auto-voice list)
- w - Indicate the auto-voice should be enabled on all networks.

### Parameters

- on - Turns auto-voice on.
- off - Turns auto-voice off.
- address - The address or nick to add/remove from the auto-voice list.
- [#channel1,#channel2,...] - List of channels to auto-voice in.
- [type] - A number representing a [\\$mask](#) to use. (if user is not found in the internal address list, a lookup is performed)
- [network] - The network to auto-voice in.

### Example

```
; Adds 'nick!nick@42.42.42.42' to the auto-voice list on the channel '#channel'  
/avoice nick!nick@42.42.42.42 #channel
```

```
; Adds 'nick!*@*' to the auto-voice on any channel.  
/avoice nick
```

```
; Remove 'nick!nick@42.42.42.42' from the auto-voice.  
/avoice -r nick!nick@42.42.42.42
```
