

AdiIRC - Channels - # 1

Added in 2.5

/channels [-adnp] <#channel> [password] [Description]

Adds or removes channels from the current server if it's a server saved in the serverlist.

Switches

- a - Join the channel on connect.
- d - Delete the channel.
- n - Minimize the channel on join.
- p - Indicates [password] is defined.

Parameters

<#channel> - The channel to add/modify/delete.

[password] - Channel password, used with -p.

[Description] - Channel description.

Example

```
: Add channel #test to the serverlist.  
/channels #test
```

```
: Add channel #test to the serverlist as a autojoin channel.  
/channels -a #test
```

```
; Delete channel #test from the serverlist.  
/channels -d #test
```
