

## Colors Options

Tip. You can right click a color to Copy/Paste/Reset it, CTRL + C / CTRL + V for copy/paste also works.

### Override Windows theme colors

When enabled, Menubar/Toolbar/Switchbar/Statusbar/[Monitor Panels](#) colors will be used, otherwise the default Windows theme colors will be used.

See also [Extra Colors](#), [Config File Colors](#), [\\$color](#).

### Use extended colors for events

If enabled, mIRC colors 16-35 can be changed with their own separate [\\$rgb](#) value, the RGB values will be used for various IRC events, otherwise only mIRC colors 0-99 can be used.

See also [Extra Colors](#).
