

AdiIRC - Dde - # 2

Added in 1.9.4

/dde [-re] <name> <topic> <item> [data]

Sends an XTYP_POKE request to the specified [DDE](#) service.

Switches

- r - Specifies you are sending a XTYP_REQUEST.
- e - Specifies you are sending a XTYP_EXECUTE.

Parameters

- name - [DDE](#) service name to query.
- topic - Topic to query.
- item - Item to query.
- [data] - Data to send.

Example

```
;Sends a DDE command to the DDE service "AdiIRC".  
/dde AdiIRC command "" /echo -ag Hello World from /dde.
```
