

AdiIRC - Ddeserver - # 5

Added in 1.9.4

/ddeserver [[on [service name]] | off]

Turns on or off the [DDE](#) service, if you have more than one instance of AdiIRC acting as a [DDE](#) service, you should give them different names.

No parameters shows current [DDE](#) service status.

Parameters

[on [service name]] - Turns on the [DDE](#) service and optionally giving it a new name.

[off] - Turns off the [DDE](#) service.
