

AdiIRC - Editbox - # 13

Added in 1.9.0

`/editbox [-abNeNEfNinopqNsvckhN] [window] <text|color>`

Fills the [Editbox](#) of the current or specified window with the specified text.

See also [\\$editboxhistory](#), [\\$editbox](#).

Switches

- a - Use the [Editbox](#) from the current active window.
- bN - Set selection start to position N.
- eN - Set selection end to position N.
- E - Use the current active Editor. **(AdiIRC only)**
- fN - If N = 1/[\\$null](#) sets focus to the [Editbox](#) and makes sure the window is not minimized and active.
- i - Inserts the text at current cursor position. **(AdiIRC only)**
- n - "press" enter on the Editbox after the text is added.
- o - **TODO**
- p - Append a white-space after the text.
- qN - **TODO**
- s - Use the [Editbox](#) from status/server window associated with current window.
- v - Prevents the [Editbox](#) contents from being changed.
- c - Sets the [Editbox](#) text color. **(AdiIRC only)**
- k - Sets the [Editbox](#) background color. **(AdiIRC only)**
- hN - Sets the [Editbox](#) history item to the Nth item. **(AdiIRC only)**

Parameters

[window] - The window to edit.

<text|color> - The text to append/insert or the color to set.

Example

```
; Inserts 'Hello World!' into the Editbox in current active window.  
/editbox -a Hello World!
```

```
; Inserts 'Hello World!' into the current active Editor, must be triggered by a custom shortcut.  
/editbox -E Hello World!
```
