

AdiIRC - Emailaddr - # 1

Added in 1.9.7

/emailaddr <address>

Act's as an alias for [/usernick](#).

Changes your usernick/ident on current connection.

If connected from the serverlist, the serverlist is updated, else quick connect is updated.

Parameters

<address> - The new address.

Example

```
; @host.com is ignored  
/emailaddr Obiwan@host.com
```
