

## AdiIRC - Enable - # 3

*Added in 1.9.0*

**/enable <group1 group2 ... groupN>**

Enables the specified groups in all scripts.

[Wildcards](#) is allowed.

See also [/disable](#), [\\$group](#).

### Parameters

<group1 group2 ... groupN> - A list of groups to be disabled.

### Example

```
; Enable group #one #two #three.  
/enable #one #two #three
```

```
; Enable all groups matching #*o*.  
/enable #*o*
```
