

AdiIRC - Fwrite - # 1

Added in 1.8.10

/fwrite [-bn] <handle> <text | &binvar>

Writes text or the specified binary variable to the file.

Switches

- b - A binvar is specified.
- n - Append a [\\$CrLf](#) at the end of the text/&binvar.

Parameters

- <handle> - The file handle to write to.
- <text | &binvar> - The text or &binvar to write.
