

AdiIRC - Hrename - # 1

Added in 3.9

/hrename <table> <newtable>

Renames a [hash table](#).

Parameters

<table> - The table name to rename.

<newtable> - The new table name.

Example

```
alias testrename {  
    hmake table  
    hadd table item value  
    echo -sg $hget(table, item)  
    hrename table newtable  
    echo -sg $hget(newtable, item)  
}
```
