

Nick Colors Options

See also [/cnick](#).

Use random nick colors

Enable or disable random nick colors.

Use extended color list

If enabled, the random nick color will be a full [\\$rgb](#) value ([instead of just color 0-15](#)), and if the color is too close to the background color, it will be inverted.

This option is still in testing, feedback is welcome.

Method

Enable nickcolors for messages, Nicklist or both.

Enable nick colors

Enable or disable nick colors.

Color entire line

Enabled:

[42:42] <Nick2> Writing some text

Disabled:

[42:42] <Nick2> Writing some text

Color nicks in messages

If enabled, matching channel nicks in messages will be shown using their nick color.
