Added	option to show network name and/or nick name on Switchbar status windows
Added	option to show server info/ssl info in Statusbar
Added	new MTS event ClientText
Added	option to show/hide icon in Menubar
Added	option Enable Menubar in Options -> Windows

Added	option tab for Switchbar in Options
Added	option to set single or multiline Switchbar If Lock Bars is enabled, Switchbar will split into multiple lines, else a overflow button is shown. In single line, there is no multiline or overflow.
Added	option and right click menu to set Switchbar/Treebar/Menubar/Statusbar font
Added	right click menu to set background image/layout for Menubar/Toolbar/Switchbar/Statusbar
Added	right click menu to set dock position for Menubar/Toolbar/Switchbar
Added	Nicklist buttons editor
Added	new event Server Notices in Options -> Events
Added	new sound event Buffer
Added	new keybind shift + f5 to reload a script and send on LOAD event in Script Editor
Added	option to disable the sound when the window is focused
Added	DPI support to most items
Added	option to show Nicklist Tooltips with text parsed as scripts
Added	option to show fake transparency to windows desktop
Added	option to show fake transparency to the mdi window in Nicklist
Added	triple click support for textboxes
Added	right click menu Open Folder in plugin manager
Added	ssl support for all internal links, update checks, search engines etc
Added	separate font and join/hide/quit etc events per channel
Added	f5 keybind in Plugins Manager to reload plugins list
Added	new API calls server.FindUser, server.FindChannel, OnRawData, SendRawData
Added	option to show/hide top panel in script editor
Added	option to set pixel spacing between messages
Added	option to set left message border
Added	ctrl + i, ctrl + c keybinds in channel list
Added	support for bold/italic/underline in all fonts
Added	new keybinds ctrl + alt + left/right to cycle tabs including minimized windows
Added	option to set more lines in Editbox
Fixed	removed shift + select keybind for selecting text + colors, use ctrl + select instead
Fixed	delay track away status on connect to avoid connection lag
Fixed	show a confirmation dialog when trying to paste more than five lines into a single line Editbox
Fixed	allow pasting multiple lines into single line Editbox
Fixed	channel topic is not properly reset when rejoining a channel
Fixed	Scrollbar settings should apply to Server/Channel monitor as well
Fixed	sometimes a nick appears twice in the nicklist with different nick casing
Fixed	allow using exe file icon as custom icons

Fixed	pageup/pagedown in a custom window without a textarea causes a crash
Fixed	[] brackets is not always parsed correctly in MTS themes
Fixed	MTS Themes should not show empty part/quit messages etc
Fixed	dcc transfers/chat request window should not block incoming messages
Fixed	custom font size is not restored in font dialog
Fixed	allow selecting links when pressing shift without opening it when single click links is enabled
Fixed	changing window from the tray icon menu doesn't work sometimes
Fixed	Searching text in Searchbox can in some cases cause a crash
Fixed	Rawlog should use the toolicon
Fixed	text selection selects the wrong text when the buffer is full and a new line is added
Fixed	unescaped timestamps interferes with message linecolors
Fixed	channel editor escape should close the color dialog
Fixed	channel editor topic keybinds should be disabled in read only mode
Fixed	looking up hostname should change the Toolbar icon and Titlebar text to connecting
Fixed	with treebar "show left-to-right scrollbar" option enabled, the name of the 1st network in the treebar will disappear when you scroll too far
Fixed	window location/size should be validated when docking/undocking
Fixed	re-docking a window to a minimized mainwindow, should restore windowstate as the current windows
Fixed	Trayicon tooltip text should use the /titlebar text and should show connected servers and channels
Fixed	/list modes are not parsed correctly on all networks
Fixed	restore previous query/channel logs crashes on certain nicks and channels
Fixed	restore previous query/channel logs sometimes returns wrong log files
Fixed	NotifyUser(IUser,) api does not work properly
Fixed	a fake channeluser should be created when none is found using the api
Fixed	OnUserMessage api target is null in query windows
Fixed	Switchbar/Treebar colors and window blinking is sometimes not reset when AdiIRC is focused
Fixed	Menubar should re-hide when focus is lost, if Menubar is set to hidden
Fixed	escape should close search box in log viewer
Fixed	plugins should be listed in the plugin manager even if it throws an error on install
Fixed	escape should close the search box if visible in custom windows
Fixed	Searchbox should be disabled in picture windows
Fixed	highlight tips shows the wrong title
Fixed	disabled keybinds for font/colors tags in readonly Topicbox

Fixed	disabled drag/drop support on read only Topicbox
Fixed	reduce amount of GDI objects to not crash when joining many channels
Fixed	scrolling is slow when using big background images
Fixed	re-add image transparency to mdi image
Fixed	font dialog dropdown should only trigger on typed characters
Fixed	new script is not focused when script sidebar is hidden
Fixed	Ctrl+Tab/Ctrl+Shift+Tab/Alt+left/right should ignore minimized windows
Fixed	clicking the Editbox/Topicbox border should give the window focus
Fixed	right clicking on a color in Options -> Color should focus the color grid
Fixed	scripts in Script Editor should only be saved when there is a change
Fixed	Tool popup window should adjust size automatically based on content and screen size
Fixed	Toolbar button background should apply to custom buttons and Edit Toolbar buttons as well
Fixed	serverlist should have scrollbars when needed
Fixed	/logs should not show "Searching.." when there is no logs
Fixed	Options split width is not restored properly
Fixed	Editbox size should adjust automatically when changing number of lines options
Fixed	channel prefix should not be added if there is already a prefix in irc:// links
Fixed	Regain nick should not try to regain empty pref nicks
Fixed	\$channel doesn't work in Titlebar. Also, can't set caption on query windows when undocked
Fixed	highlights regex doesn't work
Fixed	pressing escape on a desktop custom window should close it
Fixed	changing background color in Editbox/Topicbox sometimes leaves a unpainted border
Fixed	event options for /names doesn't work
Fixed	some variables are not unset on server disconnect
Fixed	reopening a closed mdi docked panel causes a crash
Fixed	ctrl + r in script editor should not toggle mute sounds
Fixed	Mark As Read/Mark Server As Read menus should be disabled if all windows are read
Fixed	consolidate font chooser into one dialog, allow resetting fonts to default value
Fixed	delete file in Edit Aliases/Nicklist buttons should restore defaults
Fixed	default background Image layout of Menubar/Toolbar/Switchbar/Statusbar should be tiled
Fixed	Channel modes incorrectly include channel prefix modes
Fixed	Options -> Events -> Notice should be "In Active" by default
Fixed	changing font in Treebar sometimes causes a graphic glitch
Fixed	new version text in Update Form should automatically adjust to fit
Fixed	if marker line is visible when pressing ctrl + l, scrollbar should

	scroll to bottom
Fixed	global hotkey is not working properly
Fixed	show usermodes on Statusbar nick label
Fixed	Highlight flash message and tip message times are not restored properly in edit highlights dialog
Fixed	Nick tips are showing the wrong nick name
Fixed	mdi border is wrong when Showing/Removing Titlebar
Fixed	server Notices should be shown in notice panel as well
Fixed	MTS themes channel topics is displayed in the status window
Fixed	windows settings is not saved properly when using /part
Fixed	show a warning the first time sound mute is enabled/disabled through ctrl + r
Fixed	single click links doesn't work in Topicbox
Fixed	whitespace before a link should not be clickable
Fixed	connect button should open a empty server window if no there is no open servers windows
Fixed	server Disconnect/Connect menus should be enabled/disabled depending on current server connected status
Fixed	whois "has been idle" displays incorrect idletime if idletime is less than 1 second
Fixed	Topicbox colors should invert the same way messages does

Fixed	italic fixedsys font is displayed incorrectly
Fixed	hide now playing menu's unless a song is playing
Fixed	default Treebar font is not applied on startup
Fixed	clicking links doesn't work if Nicklist is hidden
Fixed	toggling Nicklist autohide, should hide the Nicklist at once
Fixed	hidden Nicklist can sometimes cause a crash
Fixed	alt + f4 should close current active form, not mainform
Fixed	Statusbar items are not restored correctly if options is saved with Statusbar off
Fixed	scrolling position is reset in Colors option window when clicking, if scrolled down (on first click and when leaving color pick dialog)
Fixed	panel form windows should save/restore docked status/size/position
Fixed	message colors are not updated immediately
Fixed	/names target window and color is wrong
Fixed	typing text in multiple languages in Editbox doesn't work properly
Fixed	quick connect servers are filled incorrectly from the serverlist
Fixed	background images -> Stretch should keep aspect ratio

	Fixed	time variables %ff, %T, %TT is displayed incorrectly
	Fixed	typing nick search in Nicklist with no scrollbar causes some nicks to be hidden
	Fixed	toggle Treebar folders on/off removes custom/fav icons
	Fixed	[] brackets from whois and channel info messages should be removed
	Fixed	toggle nicklist in Treebar can sometimes cause a crash
	Fixed	"Allow only one copy" option can cause a ghost window to appear
	Fixed	replacing text in Script Editor selects the wrong text
	Fixed	color popup dialog should be disabled in read only textboxes
	Fixed	channel background image should be updated immediately
	Fixed	docking of undocked monitor panel should be disabled if "Lock Bars" is enabled
	Fixed	toolbar cpu/mem monitor should be transparent to the background image
	Fixed	previous Treebar Folders expands when changing folder
	Fixed	numpad numbers should not close color form in Channel Editor
	Fixed	toggling Treebar folders on/off resets the new message color
	Fixed	undocked windows are not restoring window state correctly
	Fixed	right click channel -> Background -> Select uses wrong image layout
	Fixed	right click channel -> Background -> Set as Default causes a crash
	Fixed	channel password is not restored properly when using bnc's
	Fixed	default query invite to channel menu doesn't work
	Fixed	installing a update on startup sometimes causes a crash
	Fixed	overflowing buttons when moving/resizing Switchbar doesn't always work correctly
	Fixed	always on top status should be saved across sessions
	Fixed	color dialog is not returning focus to Editbox when mainform is "on top"
	Removed	boldify from topic to avoid font glitches
	Removed	/kill from default nicklist menu
	Rename	Inputbox to Editbox everywhere

#### Scripting:

	Added	ONKEYDOWN and ONKEYUP event for channels and queries and allow using halt to override built in keybinds, use with caution
	Added	new identifiers \$keylocked, \$font, \$screenshot, \$muted, \$lineheight, \$starting, \$exiting, \$envvar, \$tips
	Added	new commands /nickcolumn, /mute
	Added	new parameter -a for closing windows on all connections on /close
	Added	new parameter -f -b for /nicklist
	Added	new parameter -i for /paths

	Added	new parameter -u for /echo /echox
	Added	new parameter -t for /options
	Added	new parameter -r for /lock
	Added	new parameter -i for /edit
	Added	new parameter -qN for /window
	Added	new parameter -p for /close
	Added	new parameter -p for /clearall
	Added	new parameter -o for /clear
	Added	new parameter %var for /fakeraw
	Added	new operators isurl !isurl
	Added	new property .realname for \$ial()
	Added	new property .wid for \$dockpanels
	Added	new property .fontunderline for \$window
	Added	missing parameters @menu -o for /toolbar
	Added	missing commands /copy, /flushini, /mdi
	Added	missing properties .bw .bh .idle for \$window()
	Added	missing properties .selstart .selend .visible .enabled .isid .next .prev for \$did
	Added	missing properties .sq .rq for \$sock
	Added	missing properties .wid .cid .hwnd .idle for \$chan
	Added	missing identifier \$keychar, \$bname, \$debug, \$comchar
	Added	missing parameter -1 -2 -3 for \$window
	Added	missing parameter -z for /server
	Added	missing parameters -n -p for \$readini
	Added	missing parameter -e for /background
	Added	missing parameters M &binvar for \$fread
	Added	missing parameters -f -v for /editbox
	Added	all missing parameters for /debug
	Added	missing dialog event "active"
	Added	missing event on MP3END
	Fixed	/echo N+ should be ignored
	Fixed	\$var(*) does not work, \$var().local/\$var().secs returns wrong value
	Fixed	don't allow //<space> // \$ // %   evaluations in Editbox
	Fixed	/server -j #channel password does not wor
	Fixed	\$regex \$regsub \$regsubex \xN doesn't work
	Fixed	\$rgb with negative decimals returns wrong values
	Fixed	\$uptime should return uptime in seconds since server was connected
	Fixed	/alias should use default aliases when alias file is missing
	Fixed	\$style doesn't work in \$submenu
	Fixed	/did -g N does not work
	Fixed	allow multiline comments in menus
	Fixed	/drawpic filename is not validated correctly

Fixed	/clearall should clear dock panels as well
Fixed	/drawtext with negative x y values doesn't work
Fixed	Uclick event should only trigger on left mouse button
Fixed	/echo -l should use the first word as highlight nic
Fixed	\$com().result \$comcall().result sometimes returns wrong value
Fixed	\$com \$comcall method DISPATCH_PROPERTYPUT does not work
Fixed	/alias deleting alias doesn't work
Fixed	/encoding is not validated properly
Fixed	MTS theme cache should use spaces for indentation
Fixed	/window should focus editbox on desktop windows
Fixed	/did -o replacing the first line does not work
Fixed	halting some identifiers using \$\$ doesn't work
Fixed	/dialog dclick event is not working for links
Fixed	\$hget() items can be a number
Fixed	\$bvar should not trim newlines
Fixed	empty \$exist() should return \$false
Fixed	\$rgb(name) returns wrong value
Fixed	/filter with only one target switch is not working correctly
Fixed	\$dde(channels) should return channels from all networks, active channel should be marked with a *
Fixed	\$regex/\$regexsub/\$regexsubex is sometimes slow
Fixed	\$calc add floor divide operator //
Fixed	when restoring from minimized state, windows are sometimes moved down and/or resized. Happens mostly with Aero Shake.
Fixed	/sline should scroll the selected item into view
Fixed	dclick \$1- in listbox should return the line number
Fixed	allow wildcards in @mouse events
Fixed	WM_MCOMMAND and WM_MEVALUATE is not working properly
Fixed	\$disk(unknown drive) should return \$false
Fixed	/dline allow N- lines
Fixed	/savebuf is not saving the correct items
Fixed	/splay add missing queue system
Fixed	/splay play pos doesn't work
Fixed	/say should be validated
Fixed	/window -c should not show a warning if window doesn't exist
Fixed	\$chan(invalidchannel) should return same value as \$chan(0)
Fixed	/server port should be validated for valid range
Fixed	\$mp3() sometimes returns wrong values
Fixed	\$chr(160) should not be trimmed from scripts
Fixed	on CLOSE event should trigger when channel windows are closed as well
Fixed	\$mouse.key sometimes returns wrong value
Fixed	/echo -l can cause a crash on custom windows
Fixed	some identifiers querying Nicklist can cause a crash if Nicklist is modified while querying

Fixed	/echo -n should not flash the Switchbar/Treebar icon
Fixed	\$regex \$regsub \$regsubex \cc \cb \co custom markers
Fixed	/close -@ wildcard is not working
Fixed	\$window() add @wildcard support
Fixed	\$highlight().color \$highlight().sound returns wrong value
Fixed	\$highlight() should strip colors/font tags before comparing
Fixed	\$cid and \$wid and related identifiers/properties should be a incremental number
Fixed	/viewlog scroll position are sometimes reset when minimizing the log window
Fixed	\$highlight(N) should ignore decimal numbers
Fixed	allow @<\$wid> in window related commands/identifiers
Fixed	\$window().dx \$window().dy sometimes returns wrong values
Fixed	/sockwrite should be executed after the script ends, and only one on SOCKWRITE event should be triggered
Fixed	\$newnick returns wrong value
Fixed	/showmircc /showadiirc -s should restore window from tray
Fixed	/tip -c 0 does not work
Fixed	\$tip(0) returns wrong value
Fixed	\$fopen \$fread \$fgetc if name is a number, index in name list should be used
Fixed	dialog text items are sometimes created as multiline when they shouldn't
Fixed	alias keybindings is not working in undocked channel windows
Fixed	on APPACTIVE is not always triggered correctly
Fixed	\$submenu items are not always validated correctly
Fixed	/window -a should show the window if it's hidden and focus the main window
Fixed	menus are not working in picture windows
Fixed	\$feof returns wrong value
Fixed	/notify -r should remove the nick from the Notify monitor panel
Fixed	/dde \$dde should be unicode
Fixed	/window -h /window -w should not hide a Status Window from Treebar
Fixed	\$findfile \$finddir " should be removed from path
Fixed	/lock doesn't work when restored from tray icon
Fixed	cancel /lock dialog, should not minimize main window
Fixed	allow identifiers in default part message to be evaluated
Fixed	/window +borders should prioritize the first chosen border
Fixed	disabled dialog text items are painted with wrong color
Fixed	\$timer().reps returns wrong value
Fixed	on OPTIONS event should be called every time the config file is changed
Fixed	\$nick is \$null on ACTIVE and on CLOSE event
Fixed	\$bindip().ip returns wrong value
Fixed	\$replace/\$replacex should show a error when using uneven amount of parameters

Fixed	/nick on disconnected servers does not update the nick in the statusbar
Fixed	preload \$cpuload to avoid it hanging on first run
Fixed	/background should save background images for Menubar/Statusbar etc
Fixed	on TEXT identifiers using \$1- in the message parameter doesn't work
Fixed	on ACTIVE should trigger when main window gets focus as well
Fixed	/timer is not always associated with the correct server
Fixed	\$servertarget \$lactivecid \$status returns wrong value in some cases
Fixed	\$strip is not stripping reverse character
Fixed	\$server and \$nick is empty in on DISCONNECT event
Fixed	/titlebar @window should include the window name
Fixed	/titlebar shouldn't allow empty titles
Fixed	identifier warning is sometimes shown incorrectly
Fixed	invalid spaced brackets sometimes evaluates regardless
Fixed	dialog id range does not work with dialog events
Fixed	/did -o does not work for text labels
Fixed	\$replacex returns wrong value with multiple inputs
Fixed	\$color \$colour /color /echo -c does not always find the correct color
Fixed	\$snick sometimes returns wrong value if no nicks is selected in the Nicklist
Fixed	\$myident/\$myhost doesn't work in window titles
Fixed	/titlebar should save/restore the title to the config file
Fixed	/editbox [window] is not working properly
Fixed	\$ial().user should return ident
Fixed	/background does not update custom background image menus
Fixed	/.setconfig /.setoption should quiet the output
Fixed	/query should not open a new window when multiple nicks is defined
Fixed	/close should only close windows on current connection
Fixed	/slap allow multiple nicks
Fixed	\$read(,n) should return a random line
Fixed	/window -o -u is not working properly
Fixed	/window -k0 does not remove the @ from the titlebar on new windows
Fixed	/window -kXX is not validated correctly
Fixed	\$keyval returns wrong value
Fixed	allow merging menu item if previous and current menu name is the same
Fixed	sub menu items in empty menu items are displayed incorrectly
Fixed	\$submenu sometimes causes a endless loop
Fixed	some identifiers returns incorrect values in menus
Fixed	menu's does not work when /remote is off
Fixed	clearing a picture window linked to a toolbar button causes a crash

## AdiIRC 1.9.5 - 05-09-2014

	Fixed	remove /kill from default nicklist menu
	Fixed	installing a update on startup sometimes causes a crash
	Fixed	version is incorrectly labelled as 1.9.5 beta
	Fixed	64 bit stable version is checking for 32 bit update
	Fixed	/list does not work on some networks
	Fixed	/window -o -u is not working properly
	Fixed	/.remove should not print errors
	Fixed	\$color(N) \$colour(N) returns wrong value
	Fixed	/dialog allow - in front of options
	Fixed	/search /findtext should search in active window
	Fixed	picture window mouse events doesn't work
	Fixed	/drawtext is not always validated correctly
	Fixed	Treebar should be visible by default

## AdiIRC 1.9.4 - 01-09-2014

	Added	set background menu item for custom windows, if picture window, allow saving the background as a file
	Added	option to autohide nicklist
	Added	option to set window order
	Added	option to show folders and folder count in Treebar
	Added	option to set inputbox/editbox single/double or automatic lines
	Added	menuitems to connect and connect in a new window in Serverlist
	Added	extended menu for rightclick Titlebar menu on undocked windows
	Added	option to keep channels open when parting
	Added	filtering of html files in Help menu
	Added	theme manager right click menu Reload
	Added	md5/sha1 and pgp hashes for all exe files
	Added	f3 keybind for searchbox
	Added	open folder menu item in /logs
	Added	option in Script Editor to hide the script list and add keybind ctrl + r to toggle on/off
	Added	External Editor option in Script Editor and rightclick menu for opening scripts/logs
	Added	regex support for filenames in /logs
	Added	searchbox and Ctrl + F keybind and rightclick menu for channel/server monitor
	Added	shift + pagedown/pageup/home/end keybind in Nicklist
	Added	a minimum size for Switchbar and enabled overflow for Menubar/Toolbar/Switchbar

Added	ctrl + i keybind in Logs manager and nicklist to invert selection
Added	support for channel nick mode 'y'
Added	DDE server support and options
Added	shift + tab hotkey in Treebar to give focus to inputbox
Added	option to animate trayicon on private messages
Added	color names to numbered colors in Options -> Colors
Added	\$me variable for Options -> Nick Colors
Added	right click Switchbar/Treebar menu to enable/disable monitoring of a window
Added	1 pixel left border if Menubar/Toolbar/Switchbar is docked vertically or Lock Bars is enabled
Added	option to use small line marker
Added	option to show/hide messages and Nicklist scrollbar
Added	option to show/hide Titlebar
Added	separate default icon for custom windows
Fixed	MDI windows are some times "stuck"
Fixed	default highlight options is missing if no config file is present
Fixed	windows menu is slow with 80+ windows
Fixed	context menus crashes with windows blinds
Fixed	clicking menu separators should not close the menu
Fixed	brackets is not parsed correctly in mts themes
Fixed	tab character is not visible in menus
Fixed	links are sometimes not clickable
Fixed	ChannelMonitor/ServerMonitor colors is not updated immediately when changing colors
Fixed	double clicking on channel names in dockpanels doesn't work
Fixed	Reset button in Edit Menus/Aliases should be before Close button
Fixed	connecting to a new server in a current server window, should close all query and channels windows
Fixed	Switchbar button tooltip text should be the associated window text
Fixed	Edit Aliases line numbers are 1 line off
Fixed	alt tabbing to AdilRC, focus should restore to script editor if it previously had focus
Fixed	custom nickcolor should work for your nick as well
Fixed	allow drag/drop multiple scripts in Script Editor
Fixed	allow duplicate menu items
Fixed	menus with no sub menus and no script should be disabled
Fixed	show fullscreen warning only once per session
Fixed	there should be a menu separator between script menus and remote menus
Fixed	Theme manager -> open theme should filter by mts not mrc
Fixed	last line of Rawlog -> Save/Buffer -> Save is missing
Fixed	last character cannot be searched in Script Editor
Fixed	disabled menu items should have an arrow

Fixed	menu check arrow is not centered correctly
Fixed	Statusbar nick is missing prefix when joining a empty channel
Fixed	default main window size should be a percentage of the screen and centered
Fixed	Treebar should be visible by default
Fixed	Theme manager should open in the center of the mainform by default
Fixed	confirm closing server and channel windows should not ask on other window types
Fixed	timestamp in logs should be enabled by default
Fixed	options -> Treebar, nicklist options should always be available
Fixed	recent Files menu in Script Editor should be disabled if there is no history
Fixed	strip colors should not be enabled by default in Options -> Logging
Fixed	Korean characters are not displayed correctly/Possibly other Asian characters as well
Fixed	Theme manager should check if new theme is valid before deleting any old theme
Fixed	channels excluded from logging is not saved correctly in Options
Fixed	reset ignore options doesn't work
Fixed	Nicklist prefix is wrong on some networks
Fixed	left click and moving the mouse in nicklist, should select nicks
Fixed	sift + click in Nicklist doesn't work
Fixed	ctrl + a doesn't work in all textboxes
Fixed	closing a undocked window should close it instead of redocking it
Fixed	undocking a panel should give it focus
Fixed	allow resizing Logs, save and restore size/location and allow it to be docked/undocked
Fixed	ctrl + k color dialog should be closed when changing window
Fixed	clicking populate, then closing Channel List can cause the list to be outputted to the status window
Fixed	clicking Save All in Script Editor should ask for filename for new scripts
Fixed	if inputbox is multiline, ctrl + home/end should go to the start/end of inputbox
Fixed	allow moving text by drag drop in Script Editor, Inputbox and Topicbox
Fixed	tabbing between controls in Script Editor is not working properly
Fixed	don't allow filename with only whitespaces in Script Editor
Fixed	enter key in /logs should open viewlog
Fixed	saving large scripts in Script Editor is slow
Fixed	/logs -> Viewlog search match should be selected
Fixed	double clicking channel name in a inactive channel window doesn't rejoin the channel
Fixed	ctrl + L is not always scrolling unread line marker into view correctly
Fixed	main window windowstate is not always restored correctly

	Fixed	inputbox and topicbox should have a maxheight
	Fixed	list channels dialog menu uses the wrong style
	Fixed	spamming escape key in topicbox causes a crash
	Fixed	search should be reset in highlight panel before doing a new search
	Fixed	when resuming after hibernate, only previously connected servers should be reconnected
	Fixed	a potential crash on exit
	Fixed	tray icon is not always disposed correctly on exit
	Fixed	tray icon flash and tips don't work with send to tray on minimize
	Fixed	inputbox text is not selectable unless the window has focus
	Fixed	cycling between inputbox/nicklist/topicbox with shift + tab is not working correctly
	Fixed	border size changes is not updated immediately
	Fixed	page up/down in textview is one line off
	Fixed	treebar server font weight should not be bold by default
	Fixed	remove bold from switchbar items
	Fixed	reset Treebar options is resetting to the wrong font
	Fixed	line marker size changes is not updated immediately
	Fixed	flash option in highlight items is ignored
	Moved	Identd options into Server tab
	Removed	Options -> Window default sizes and use a percentage of the mdi clientarea instead

#### Scripting:

	Added	missing parameters -gN -jN -kN -r -u -zN -v -r -i -l -S -s -H -x for /window
	Added	missing parameters -a -h -l -n -s for /aline
	Added	missing parameters -h -l for /dline
	Added	missing parameters -a -h -s -l for /rline
	Added	missing parameters -a -s -r -l -e -c -m -n -t<topic> for /loadbuff
	Added	missing parameter -l -c for /clear
	Added	missing parameter -b for /drawtext
	Added	missing parameter 1 for \$crc
	Added	missing commands /filter,/savebuf,/autojoin,/color,/colour,/comclose,/comlist,/comopen,/comreg,/showmirc,/showadiirc,/rline,/ddeserver,/dde
	Added	missing identifier \$filtered,\$beeps,\$alias,\$bnick,\$click,\$cnick,\$ctimer,\$compact,\$dbuw,\$dbuh,\$leftwin,\$leftwinwid,\$leftwincid,\$compress,\$decompress,\$emailaddr,\$findfile,\$finddir,\$fullname,\$hash,\$inroundrect,\$lactivecid,\$modelfirst,\$modelast,\$onpoly,\$stripped,\$com,\$comcall,\$comval,\$comerr,\$dde,\$isdde,\$ddename
	Added	new command /highlight [on off] and rightclick switchbar/treebar menu -> Highlight to enable/disable highlights for that window
	Added	new command /fullscreen [on   off]
	Added	new command /lock <password> and ctrl + minimize keybind for locking down the mainwindow

Added	new command /quickconnect toopen quick connect dialog
Added	new identifiers \$dockpanels,\$sha2
Fixed	/run is not always validated correctly
Fixed	\$gfx should be trimmed
Fixed	on events matchtext/target is not always evaluated correctly
Fixed	/run incorrectly reports an error on success
Fixed	/gcmem should output to current window
Fixed	\$1 returns wrong value in some menus
Fixed	/sysinfo default syntax \$screen, should be \$screen \$+ ,
Fixed	/google /pgoogle \$decode(,h) decoding sometimes returns wrong value
Fixed	/query /queryfn <nick> should not send a query message
Fixed	/window -wN is not hiding/showing window in Treebar/Switchbar properly
Fixed	\$submenu punctuation marks should be ignored
Fixed	/dialog -md with no location set, should open center screen
Fixed	\$encode \$decode should use utf8 instead of ascii
Fixed	/options /config [search] should select first matched node
Fixed	/window default location should be center parent and size should be a percentage of the parent client area
Fixed	/dialog multiline text is not drawn and aligned correctly
Fixed	/dock changing from one side to another doesn't work
Fixed	/dock is not properly unregistered on exit
Fixed	/dialog icon causes a crash if icon file is not found
Fixed	single line /* comment */ is not parsed correctly in scripts
Fixed	\$lactive \$lactivecid \$lactivewid sometimes report wrong value
Fixed	/dialog tables with invalid characters in numeric values is not parsed correctly
Fixed	using /.command recursively can sometimes cause a crash inside scripts
Fixed	/background is not always validated correctly
Fixed	/if /while < > <= >= operators are returning wrong value when comparing strings to numbers
Fixed	/if /while > < >= <= !> !< !>= !<= operators returns wrong value if one parameter is \$null
Fixed	\$addtok is not always adding the token correctly
Fixed	\$qt should not add double quotes
Fixed	on OP on DEOP on HOP on DEHOP on VOICE on DEVOICE on BAN on UNBAN is missing \$1-
Fixed	/window -e should not add the first separator, if previous line is a separator
Fixed	wildcards in on event targets doesn't work
Fixed	allow isignore/lignore to be matched against switches
Fixed	menuitems with brackets and no semicolon separator are not parsed correctly
Fixed	/loadbuf is not working correctly with some invalid parameters
Fixed	\$sline doesn't work with listbox in custom windows

	Fixed	menu event dclick and lclick doesn't work with listbox in custom windows
	Fixed	\$finddir and \$findfile is not working correctly with some parameters
	Fixed	/dialog -c before dialog is shown, causes a crash
	Fixed	/drawtext is not validated correctly
	Fixed	Empty menuitems should be removed instead of being invisible in custom menus
	Fixed	\$chan(#).mode is not sorted
	Fixed	/write should show an error if write failed
	Fixed	up/Down history is not working correctly in inputbox on custom windows
	Fixed	key events from inputbox in custom windows are executed twice
	Fixed	\$window().tbtext \$window().tbstate returns wrong values
	Fixed	/window +l/+L is missing close button
	Fixed	/window -e0/-e1 is not working properly
	Fixed	/window -e should be allowed with any combination of -p -l
	Fixed	\$submenu is not evaluating identifiers correctly
	Renamed	\$docked to \$dock and return Left/Right/Top/Bottom/None

[sort\\_asc.png](#)

## AdiIRC 1.9.3 - 13-07-2014

	Added	"Close" menu item in log viewer
	Added	ability to drag text into script editor/inputbox/topicbox
	Added	ability to filter by topic and min/max users in channel list
	Added	ability to filter/search options
	Added	background image options for statusbar
	Added	button to save channel list in Channel List dialog
	Added	channel list menu item in Tools menu
	Added	ctrl + tab nick completion in Options -> Nick colors and dialog "edit"
	Added	Delete keybind in Logs manager
	Added	Events -> Motd to show/hide server motd on connect
	Added	keybinds for inserting color/font tags into tabcomplete options
	Added	keybind ctrl + a for Ignore List/Nick Colors
	Added	MusicBee now playing support
	Added	new highlight system with more options
	Added	new stacking balloon/tips system
	Added	option to enable/disable ctcp/event/raw in script editor
	Added	option to enable/disable flash icon in treebar/switchbar
	Added	option to set/hide borderstyle on main window
	Added	option to show left to right scrollbar in treebar
	Added	option to show/hide day changed message
	Added	recent files menu in Script Editor

	Added	right click menus in channel list
	Added	save channel list windows size/position
	Added	save cursor position in script editor
	Added	SMPlayer now playing support
	Added	sort button in ignorelist
	Added	support for %<tab> in input box
	Added	View -> Dock left/right/bottom/top menus
	Added	network/nick/channel information to Window -> Windows
	Fixed	#<tab> is not working properly
	Fixed	/betaup should enable check for new beta option
	Fixed	/google sometimes returns the wrong link
	Fixed	/list dialog should be cleared before a new list is retrieved
	Fixed	<colorchar><color><comma> is not parsed correctly
	Fixed	All windows should follow "Always on Top" from parent form
	Fixed	Allow column resize in /list
	Fixed	Allow smaller fonts than 8 in textview
	Fixed	Alt + left/right/up/down sometimes triggers a unicode character in inputbox
	Fixed	Alt + Tab to AdiIRC causes main window to be moved last of the tab order
	Fixed	Alt+Enter is moving one character off in input box
	Fixed	Alt+F4 does not exit
	Fixed	Away color is not updated in statusbar on /away /back
	Fixed	Changing channel password after making one in channel editor doesn't work
	Fixed	Changing switchbar from horizontal to vertical makes the text align wrong
	Fixed	Channel created/Topic set at should display as local time
	Fixed	Channel list should separate modes from topic and allow sorting by modes
	Fixed	Channel list sort order saved in translated format causes a crash
	Fixed	Channel names can have : in them
	Fixed	Channel password/limit should be read only in channel editor for normal users
	Fixed	Check for update doesn't work on mono if libgluezilla is not installed
	Fixed	Clicking a icon in toolbar should revert focus to inputbox
	Fixed	Clicking Join in channel list shouldn't close it
	Fixed	Closing channel list search, should mute the output until finished
	Fixed	Color selector should close when pressing escape in script editor, even if searchform is visible
	Fixed	Color should not flash in treebar/switchbar
	Fixed	Commands menu should give focus to inputbox after click
	Fixed	Copy text from inputbox should be in plain text
	Fixed	Copy text in topic box should give focus to input box if "focus input box" option is enabled

Fixed	Corrupt positions.ini can silently close adirc on startup
Fixed	Ctrl + g doesn't work properly on undocked scripts editor
Fixed	Ctrl + k in channel editor topic should show color dialog
Fixed	Date/Time variable %fff sometimes is missing trailing zero
Fixed	Dcc Get filestream is not always closed correctly
Fixed	DCC Send/Recive/Resume/Accept file names can be quoted and include spaces
Fixed	Default slaps.txt should have \r\n newlines not \r
Fixed	Double clicking channel names with special characters doesn't work
Fixed	Double clicking columns shouldn't join channels in Channel List
Fixed	Double rightclick in nicklist should not open a query
Fixed	Edit Menus should show a star when edited
Fixed	Empty buffers should be ignored when trying to save a buffer to file
Fixed	Entering up or down key in theme manager with no selected theme causes a crash
Fixed	File paths is not working properly on mono
Fixed	Flashing Treebar icons is not displayed correctly with large fonts
Fixed	Focus should be restored to inputbox when clicking statusbar items
Fixed	Force logging option doesn't work and may cause a crash in Options Dialog
Fixed	Help files should open on desktop
Fixed	Home/End in nicklist should select first and last nick
Fixed	Home/End/PageUp/PageDown not working correctly in Treebar
Fixed	If a treebar network was saved collapsed, channels should be rejoined minimized
Fixed	Images on Switchbar/Treebar should fade in/out when highlighting
Fixed	Incoming DCC should show full hostmask of the user in dcc dialog
Fixed	Initial dcc host is missing in Transfer monitor
Fixed	Lag count should be reset on server disconnect
Fixed	Line number height is wrong when using font size 10 in script editor/textview
Fixed	Log manager should not do a new search after deleting files
Fixed	Logform should trigger a new search log folder or log file pattern is changed
Fixed	Maximizing main window with multi line topicbox causes a graphic glitch
Fixed	Menubar/Switchbar/Toolbar/Statusbar clicks are not received if main window is not focused
Fixed	Modes should be combined when mass removing bans/invites/excepts in channel editor
Fixed	Mouse cursor is flickering when hovering topic box
Fixed	Mouseover top of the screen should show menu bar in full screen
Fixed	Nick casing should be updated whenever changed
Fixed	Nick in Statusbar is empty when opening a new server window

Fixed	Nick's,channels,links should be double clickable in topicbox, but not in edit mode
Fixed	Notices from users should be shown in active or status window
Fixed	Now playing only retrives 100 characters from some media players
Fixed	Only rejoin one channel upon reconnect
Fixed	Open Folder in file transfer window should open the default folder if there is no transfers
Fixed	Opening options sometimes causes a crash
Fixed	Painting input box/topic box border sometimes flickers
Fixed	Prefix and messages should be separated by newline if mainform is docked left or right
Fixed	Pressing Alt in full screen should toggle menubar
Fixed	Pressing Enter to make a new line in bug report textbox doesn't work
Fixed	Pressing escape asks to save in script editor even if color popup is visible
Fixed	Pressing Win+D minimizes AdiIRC if it's docked
Fixed	Previous saved windows should not load broken nicklist visibility
Fixed	Quit program warning should show connected server count
Fixed	Random user list color is using the wrong color
Fixed	Rawlog should load some lines from debug.txt when shown
Fixed	RealName should not be saved if empty in quick connect
Fixed	Remove CONF_ prefix from all items in config.ini
Fixed	Removed toolbar items are sometimes restored
Fixed	Rename casing in script manager should be allowed
Fixed	Replace button "Connect All" with "Connect in new window" in serverlist
Fixed	Reset all window sizes menu should reset open windows as well
Fixed	Resize while docked doesn't work properly
Fixed	Restart AdiIRC doesn't work on mono
Fixed	Restore logs can cause a crash if log folders have invalid permissions
Fixed	Restore logs options should always be available
Fixed	Right click crashes on some windows versions without visual styles
Fixed	Script Editor "*" should be in front of file name in case the filename is too long
Fixed	Script editor "*" should be shown in the titlebar
Fixed	Script editor menu click should register even if script editor doesn't have focus
Fixed	Script editor should ask to save modified script(s) when unloading script(s)
Fixed	Script editor should not be visible in taskbar unless "show on desktop" is enabled
Fixed	Script Editor should use selected script's path when clicking Load/Save As
Fixed	Script paths is not saved relative from Options
Fixed	Scripts should be saved with \r\n newlines instead of \r

Fixed	Selected text in topicbox should auto deselect on click
Fixed	Selecting nicks in Treebar nicklist doesn't work
Fixed	Server history is not saved correctly
Fixed	Setting the max message buffer to 0 shouldn't clear current buffer
Fixed	Shift + end on empty input box causes a crash
Fixed	Shift + end without selecting newline at the end removed since it doesn't work properly
Fixed	Shift + home should scroll to left in script editor
Fixed	Some global keybinds are sent twice in custom windows
Fixed	Some key bindings is not working on mono
Fixed	Some keybinds doesn't work in channel editor topic if it's readonly
Fixed	Sometimes winamp media player plugin detection incorrectly asks to install plugin
Fixed	Statusbar bandwidth should be shown with MB suffix
Fixed	Switchbar, Toolbar and Docking panels are inverted on mono
Fixed	Switchbar/Treebar icons should flash regardless of selected window if main window is not active
Fixed	Sysinfo OS version reports wrong OS on windows 8.1
Fixed	Tab cycling empty word doesn't work
Fixed	Text in mono version is not spaced properly
Fixed	Textview should respect Windows scrollbar width
Fixed	Theme manager is not working properly on mono
Fixed	Theme manager should use selected theme name as filename when clicking "save As"
Fixed	Toggle Treebar icons doesn't work without restart
Fixed	Tool popup dialogs should be topmost to associated form
Fixed	Treebar focus should reset when it loses focus
Fixed	Treebar items should only be selectable if the label or image is clicked
Fixed	Treebar query/system/tool colors are not reset correctly
Fixed	Typing in scripts editor/input box doesn't work properly on wine
Fixed	Use Nickcolors is saved to wrong section in the config file
Fixed	User count is not updated properly in the statusbar on channel join
Fixed	User list colors is not refreshed at once when saving options
Fixed	Using undo after saving a file in script editor, should mark the file as edited
Fixed	Variables can sometimes be reset in Tools -> Edit Variables
Fixed	Viewlog form should save/restore window position
Fixed	Weird behavior when a query chat partner revises his nickname
Fixed	When "Lock Bars" is enabled, the custom border color should be used for panels
Fixed	While docked AdIIRC should hide/show if a app goes fullscreen
Fixed	Whois and doubleclick on channel with (co)-oper
Fixed	Winamp now playing stops working after its paused or until next song starts

	Fixed	Window order in treebar is not always sorted correctly
	Fixed	Word wrapping sometimes causes a endless loop
	Fixed	Wrapped text buffer is not emptied when exceeding "Max Buffer"
	Moved	all items from away.ini to config.ini
	Moved	all items from ignore.ini to config.ini
	Moved	all items from positions.ini to config.ini
	Moved	Tools -> Ignore List, Tools -> Nick Colors into Options
	Removed	Treebar menus from Treebar window menus because menus are too big
	Renamed	channelbar and everything related to switchbar
	Renamed	sidebar and everything related to treebar
	Renamed	userlist and everything related to nicklist

#### Scripting:

	Added	/background -yz switches for statusbar/menubar
	Added	alias /options for /config
	Added	alias /setconfig for /setoption
	Added	default alias /i for /invite
	Added	missing commands /treebar /cline /queryrn /unsetall /tips /partall /remote /ctcps /events
	Added	missing event APPACTIVE
	Added	missing identifiers \$snicks \$remote \$ssl \$pi \$fullscreen \$iptype \$portable \$dccport \$url \$lactive \$lactivewid \$lof \$tip \$tips \$evalnext \$titlebar \$atan2 \$hypot \$log10 \$sinh \$cosh \$tanh \$servertarget \$menubar \$switchbar \$toolbar \$treebar \$highlight
	Added	missing operators isinvite isexcept ignore
	Added	missing parameter "me" for events
	Added	missing parameter -h for /run
	Added	missing parameter -iN for /echo and /aline
	Added	missing parameters -ie for /server
	Added	missing parameters -min/-max/channel/search for /list
	Added	missing parameters -npt for \$read()
	Added	missing parameters parameter -n for /exit
	Added	missing properties .type .mmt .ansyc .pause for \$timer
	Added	missing property "hsbar" for /dialog list
	Added	missing property .dd for \$color() \$colour()
	Added	missing property .lb for \$window()
	Added	missing property .sig for \$file()
	Added	new command /dockpanels [on off] to toggle dock panels
	Added	new command /echox which takes a %var instead of text and allows consecutive spaces
	Added	new command /edit -almnqsv for opening edit scripts etc
	Added	new command /rawx which takes a %var instead of text and allows consecutive spaces
	Added	new event OPTIONS which is triggered whenever config file is

	reloaded
Added	new identifier \$docked returns \$true if AdIRC is docked
Added	new identifier \$lag returning lag on current server
Added	new identifier \$quickconnect returns \$true if AdIRC was started with QuickConnect enabled
Added	new identifier \$randomcolors returns if random nickcolors is enabled for message, nicklist or both
Added	new identifier \$statusbar returns \$true if statusbar is visible
Added	new identifiers \$bwrecb and \$bwsentb for byte format
Added	new identifiers \$msgx \$rawmsgx to retrieve consecutive spaced versions of \$1- \$rawmsg
Added	new on event CLIENTTEXT for overriding messages sent from the client
Added	new parameter -d [encoding] for /server
Added	new parameter [search] for /options and /config to search/filter options dialog
Added	support for ignoring multiple nicks in /ignore separated by comma
Added	support for Officelrc user prefix
Fixed	on CTCP *:<matchtext>:command with no target doesn't work
Fixed	on event target is not always evaluated correctly
Fixed	on HOTLINK should be triggered on mouse down not click
Fixed	on MENU separators is not always trimmed correctly
Fixed	on RAW Some events are not triggered for scripts
Fixed	on RAW the first : should be stripped from 301, 275, 338
Fixed	on SOCKOPEN should be called even if the socket cant connect
Fixed	on START/LOAD/UNLOAD/APPACTIVE/SONG/EXIT/SIGNAL should be associated with current server
Fixed	on TABCOMP does not always return correct tab completed text
Fixed	on TABCOMP/INPUT is not always triggered correctly
Fixed	on ^NICK is not halting the text properly
Fixed	/alias /alias should not override the alias command
Fixed	/alias Allow aliases without leading '/'
Fixed	/anick with no parameters causes a crash
Fixed	/background "Status Window" doesn't work
Fixed	/background default image layout should be center
Fixed	/bcopy -c is not chopping correctly
Fixed	/bcopy <M> If M is -1, all of the bytes from position S onwards should be copied
Fixed	/beep 0 should stop beeps
Fixed	/beep <delay> should be max 1000 milliseconds
Fixed	/bin2txt is missing one character
Fixed	/bindip is not working correctly with network adapters
Fixed	/bindip quotes should be ignored
Fixed	/bread is reading 1 byte off

Fixed	/clear [window] is not working properly
Fixed	/clearall /aclear should only clear windows on current connection unless -a is specified
Fixed	/close add missing parameter -l
Fixed	/ctcp PING should use \$ctime
Fixed	/dialog "edit" "combo" add color/font tag hotkeys
Fixed	/dialog "edit" "list" size is wrong
Fixed	/dialog "edit" add missing parameters hsbars vsbar
Fixed	/dialog "list" add missing parameter sort
Fixed	/dialog -md should not center the window if position is -1 -1
Fixed	/dialog -s is resizing to wrong size
Fixed	/dialog Add exe/dll/index support for "icon"
Fixed	/dialog icon files not working
Fixed	/dialog radio button with "push" should be text align center
Fixed	/dialog sometimes crashes with invalid parameters
Fixed	/dialog using menus makes the dialog too tall
Fixed	/did -a and -r doesn't work with check/radio buttons
Fixed	/did -a text should be trimmed
Fixed	/did -i does not work on some elements
Fixed	/did add missing parameters -s -l
Fixed	/dns -46 <host> is not working
Fixed	/dns doesn't work with ipv6 addresses
Fixed	/drawcopy add missing switch -r and validate parameters
Fixed	/drawdot parameters are not validated
Fixed	/drawpic doesn't work with transparent images
Fixed	/drawpic parameters are not validated correctly
Fixed	/echo -l first word in a line should not be tested for highlight
Fixed	/echo -l first word in a line should not be tested for highlight
Fixed	/echo 1 1 is not showing correctly
Fixed	/echo if active window does not have a textview, text should go to associated status window
Fixed	/exit -r does not restart the client
Fixed	/exit without -n should ask to close active servers
Fixed	/google search result should be html decoded
Fixed	/help if no chm file is found, open relevant wiki page and parameter -l forces open wiki page
Fixed	/if /while &gt;< == operators are not working correctly
Fixed	/if /while (number isnum) is not working properly
Fixed	/if /while expressions using the ! operator are not returning the correct value
Fixed	/if /while is not working properly if first token is an operator
Fixed	/if /while remove unnecessary operator %
Fixed	/if /while(1 == 01) leading zeros should be trimmed
Fixed	/ignore -x is ignored if below other ignore rules
Fixed	/linesep add missing parameter -s and #channel
Fixed	/linesep should not add a linesep if last message is a linesep

Fixed	/load -rs should always trigger LOAD/START
Fixed	/users - display errors
Fixed	/names Multiple channel prefix is not saved correctly
Fixed	/nick should be trimmed
Fixed	/notify blank mask should not be added
Fixed	/np doesn't work with \$user
Fixed	/rename should be able to move folders
Fixed	/search /findtext add missing parameter -n
Fixed	/server -n should not connect
Fixed	/server allow <host> <+port/port> <password> parameters
Fixed	/server in on START event is not working properly
Fixed	/server with no parameters should connect/reconnect current server
Fixed	/set -sl doesn't show output
Fixed	/setoption doesn't work properly
Fixed	/setoption with no parameters should reload config.ini
Fixed	/sidebar on/off doesn't work properly
Fixed	/socklist -l is not working properly
Fixed	/sockmark name can be a wildcard
Fixed	/sockwrite &binvar doesn't work
Fixed	/statusbar View -> Statusbar saves to the wrong location in config.ini
Fixed	/time - not display the : into the time
Fixed	/timer -o is not associated with current server
Fixed	/timer add missing parameters -i and -o
Fixed	/timer is not always validated correctly
Fixed	/timer should show interval in seconds or milliseconds depending on timer type
Fixed	/timer sometimes causes a crash when AdIRC exits
Fixed	/timer with no name should be named as <n> not timer<n>
Fixed	/toolbar -l does not update alias
Fixed	/toolbar -p does not adjust icon size
Fixed	/toolbar add missing parameter -zN and ico/exe/dll support
Fixed	/toolbar doesn't work with transparent images
Fixed	/toolbar on/off/no parameters doesn't work properly
Fixed	/unload with quoted path doesn't work
Fixed	/unnotify doesn't work
Fixed	/var -g incorrectly prints value assignment
Fixed	/var add missing parameter -n
Fixed	/var halting doesn't work
Fixed	/who output should be shown in server window
Fixed	/window "Status Window" doesn't work
Fixed	/window +d   +b should have no control box
Fixed	/window +L is missing close button
Fixed	/window -a is not restoring properly

Fixed	/window -c in a on CLOSE event causes a crash
Fixed	/window -C is not centering the window
Fixed	/window Add missing parameter -a
Fixed	/write -s -w -r is not searching properly
Fixed	/write add \$crlf if -n is not set
Fixed	/write should write utf8 with no BOM
Fixed	\$( ).properties in brackets doesn't work
Fixed	\$* does not work inside brackets
Fixed	\$0 returns wrong value
Fixed	\$1 in Menubar menus should be \$me
Fixed	\$asctime() year format should be yyyy
Fixed	\$bindip should return \$null if parameter is invalid ip
Fixed	\$bindip(N) returns wrong output
Fixed	\$bytes is not precise enough
Fixed	\$bytes(0) should return 0
Fixed	\$calc((1+)+1) and \$calc(2^ %) is not working properly
Fixed	\$calc() with no parameters should return an error
Fixed	\$cb does not work correctly with unicode text
Fixed	\$chan().mode is not sorted correctly
Fixed	\$chan().pnick should return all channel prefixes
Fixed	\$chantypes is in wrong order on some networks
Fixed	\$cpuload and Help -> System variables sometimes causes a crash
Fixed	\$ctime is returning wrong result
Fixed	\$ctime() doesn't work with XXnd dates
Fixed	\$dialog() add missing owner parameter
Fixed	\$dialog().modal is returning wrong value
Fixed	\$did add missing property .csel
Fixed	\$did returns wrong value when clicking a tab page
Fixed	\$did().text returns wrong value for listbox
Fixed	\$duration does not return correct value with doubles
Fixed	\$duration(x:x:x:x) doesn't work
Fixed	\$editbox .selstart .selend returns wrong value
Fixed	\$encode \$decode add parameter h for encoding decoding html codes
Fixed	\$encrypt \$decrypt does not always work correctly
Fixed	\$event should be empty outside events
Fixed	\$exists returns \$false on mono regardless of path
Fixed	\$false should return the value \$false
Fixed	\$file() should work with directories
Fixed	\$fline does not always return correct value
Fixed	\$gfxram should be rounded
Fixed	\$inpaste does not always return the correct value
Fixed	\$input Change tab complete to ctrl + tab complete so change focus with tab works

Fixed	\$input control code keybinds should work
Fixed	\$invitemenu should use same sort order as switchbar/treebar
Fixed	\$isalias() add missing property .alias
Fixed	\$isalias() doesn't work with local aliases
Fixed	\$left \$right should return \$null if second parameter is not a number
Fixed	\$lines() is returning wrong value in some cases
Fixed	\$log(0) \$log10(0) should return \$null
Fixed	\$longip() sometimes returns wrong value
Fixed	\$longip() with no ip defined should return nothing
Fixed	\$mid does not always return correct value with negative numbers
Fixed	\$mid doesn't work with doubles
Fixed	\$mknickfn is not stripping the correct characters
Fixed	\$modespl is returning wrong value
Fixed	\$mouse.dx and \$mouse.dy returns wrong coordinates
Fixed	\$nick should be \$null outside server related events
Fixed	\$or should be uint and allow only one parameter
Fixed	\$pic().width \$pic().height causes a crash with invalid pictures
Fixed	\$player should return chosen media player regardless of play state
Fixed	\$pos returns wrong value
Fixed	\$pos(x,x,N) \$poscs(x,x,N) does not return correct result
Fixed	\$rand should allow 64 bit random numbers
Fixed	\$read -r does not fill \$regml
Fixed	\$read() can cause a crash
Fixed	\$regex \$regex \$regexsub \$regexsubex (*UTF8) should not be included in the pattern
Fixed	\$regex \$regexsub \$regexsubex doesn't work properly with global regular expressions
Fixed	\$regex \$regexsub \$regexsubex fails with underscore characters in \Q \E
Fixed	\$regex \$regexsub \$regexsubex with escape codes can sometimes cause as crash
Fixed	\$regexsub \$regexsubex substitution codes should be replaced with \$+ code \$+
Fixed	\$regexsub \$regexsubex \1 \2 is not always replaced correctly
Fixed	\$round is not validated correctly
Fixed	\$scriptdir crashes from inputbox
Fixed	\$server should return \$null if not connected
Fixed	\$sha1 should return lowercase result
Fixed	\$slapsmenu(0) should return number of slaps
Fixed	\$sock().ssl returns inverted value
Fixed	\$sock().wserrmsg should be called wsmg
Fixed	\$sockbr returns wrong value
Fixed	\$str() crashes with too high value
Fixed	\$strip add missing parameters burcmoi

	Fixed	\$submenu doesn't always add separators correctly
	Fixed	\$timer().secs is returning wrong value
	Fixed	\$timer(name) should return position
	Fixed	\$v1,\$v2,\$ifmatch and \$ifmatch2 sometimes returns wrong value
	Fixed	\$window(N) doesn't work
	Fixed	"Upgrade" old media player format from '\$song' to '\$+ \$song \$+' ,
	Fixed	\$mouse.key returns wrong value in picture windows
	Fixed	Channel collection for IUser in API is empty
	Fixed	Double spaces in scripts are not always parsed into single space
	Fixed	Errors inside identifiers doesn't halt the script properly
	Fixed	IUser in API events is sometimes empty
	Fixed	menu sclick should trigger on mouse down instead of click
	Fixed	Parentheses is not always parsed correctly
	Fixed	Pressing escape in a custom window should minimize it
	Fixed	Script variables are sometimes reset on EXIT
	Fixed	Scripted menu's should only trim white spaces
	Fixed	Some variables is not correctly passed from alias to \$identifier and back
	Removed	unnecessary commands /loopfile /split
	Removed	unnecessary identifiers \$myhost \$myident \$activeserver \$channel
	Removed	unnecessary operators hasvoice inchan isbetween
