Added	option start with windows
Added	option to check for irc:// link association on startup
Added	line marker thickness option
Added	border thickness option
Added	sysinfo recived sent identifier \$bwrec \$bwsent
Added	right click menu to save/clear input buffer
Added	userlist control buttons, view -> Userlist Buttons
Added	server and channel count to tray icon hover text
Added	searching itunes and mediamonkey playlist from ctrl + j
Added	button to merge files in log form
Added	windows -> Reset All Window Sizes menu
Added	ctrl + a for selecting all text in all textboxes
Added	\$ial().account and \$ialchan().account to get a users IRCv3 account name
Added	\$playcount tag support for winamp
Added	missing identifiers \$dll() \$dllcall() \$nickmode \$ifmatch2\$menu \$menutype \$menucontext \$activecid
Added	missing identifiers \$beta \$bits \$sslready
Added	missing command /dll -u <name.dll> <procname> [data]
Added	missing command /renwin <@oldname> <@newname> [topic]

Added	missing /U modifier for \$regex,\$regsub,\$regsubex
Added	missing \$did() parameter .isedited
Added	missing parameters .loopback .ip .name for \$bindip when looking up a ip
Added	missing parameters [-cn] [#channel] [message] for /hop
Added	missing property .idle for \$query
Added	missing m<char>pattern<char> in \$regex,\$regsub,\$regsubex
Added	missing parameter push for dialog radio buttons
Added	missing properties extsel multsel for dialog list items
Added	missing parameters -b -c for /hadd /hdec /hinc
Added	missing parameters -n / -x for /query
Added	missing /window -m [/command] [font fontsize] [iconfile] parameters
Added	missing parameters -46ch parameters and queue for /dns
Added	support for looking up nicks in /dns
Added	missing parameter "3" for \$bytes, also returns wrong format
Added	/invite [nick] [#channel]
Fixed	\$decode doesn't work with &binvars
Fixed	channel list sort crashes on some translations
Fixed	channel list sort is not saved/restored properly
Fixed	logs manager should focus log window when viewing a log
Fixed	\$bitoff returns wrong value
Fixed	clicking a toolbar icon created from the input box causes a crash
Fixed	searching some folders in Logs causes a crash
Fixed	pressing space in sidebar should show context menu
Fixed	Up/Down/Left/Right key binds is not working correctly in sidebar
Fixed	focus in sidebar should be restored when shift + clicking
Fixed	mouse middle click for closing window doesn't work in sidebar
Fixed	/setayer dialogname should set the layer on the dialog
Fixed	/setlayer with no window parameter should set layer of main window
Fixed	\$regex \$regsubex \$regsubex POSIX brackets are not working properly
Fixed	\$calc % is not working properly
Fixed	channel modes in status bar is not updated correctly on channel join
Fixed	/ctcp /notice should split long messages
Fixed	\$base is not working properly with some characters
Fixed	special characters should not be included in #channel links
Fixed	%variables are not always trimmed correctly
Fixed	/ignore -k is ignored in private windows
Fixed	#\$N # \$? should make sure return value starts with a #
Fixed	parentheses and comma is not always parsed correctly in scripts
Fixed	any combination of \$+X should work for combining words
Fixed	\$duration should be able to convert output back into seconds
Fixed	\$ctime and other unix timestamps should be year 2038 ready

Fixed	<tab> should be useable anywhere in a word in inputbox
Fixed	sending a command to a disconnected server should show a error
Fixed	typing /quit while not connected to a server causes a crash
Fixed	reload multiple scripts in script editor can cause a crash
Fixed	/clear should clear unread line marker position
Fixed	\$gettok \$deltok with negative numbers doesn't always work
Fixed	\$calc is not always parsed correctly if there are no space after a)
Fixed	\$findfile \$findir wildcards with semicolon filter doesn't work
Fixed	/tokenize 0 should tokenize nothing
Fixed	clicking line numbers in script editor should select the matched line
Fixed	pressing shift + HOME/HOME key in script editor should move cursor to start of the first non-space character
Fixed	pressing enter in script editor should indent at same space level as current line
Fixed	variables set to be removed on EXIT is incorrectly removed too early
Fixed	"Rename" in script editor should retain previous file extension
Fixed	"Save As" in script editor doesn't unload the previous script
Fixed	/unload -rs should unload first file name match
Fixed	allow \$~name identifiers
Fixed	if there are no more undo actions in script editor, script should not be marked as changed
Fixed	using "Delete" text menu item in script editor/inputbox should allow Undo
Fixed	small graphical glitch in sidebar with channels containing & character
Fixed	\$int() doesn't work with large numbers
Fixed	\$host and \$ip should be filled with local ip/hostname before a server connects
Fixed	\$version should reply only the version number
Fixed	if a nick has illegal characters, inputbox should ask for a new /nick instead of trying alternative
Fixed	/nick on a offline connection should change the connection nick for that connection
Fixed	/scon 0 doesnt work
Fixed	\0 in \$regsub \$regsubex returns wrong count if /g modifier is used
Fixed	\$calc crashes sometimes
Fixed	\$bytes(N) should handle bigger numbers
Fixed	spaces before and after {} brackets should be required in scripts
Fixed	KICK event is not triggered if kick came from a user not in the channel
Fixed	background missing from \$color()
Fixed	\$/?/?="" is not parsed correctly
Fixed	theme manager is not working correctly with translations
Fixed	/ <code><space><text></code> should be ignored in inputbox

Fixed	on START is not triggered at the right time
Fixed	\$shortfn() sometimes return no value
Fixed	\$nofile() is missing a \ at the end
Fixed	@#channel notices are not parsed correctly
Fixed	/onnotice is not sending the correct format
Fixed	topic set, channel created date time format should match \$asctime
Fixed	%f %ff %fff time variables is now 1-2-3 decimals of milliseconds
Fixed	\$script(n) should return full path instead of relative
Fixed	\$ini \$readini \$remini /writeini - relative path is sometimes wrong
Fixed	double clicking in a server window should send /users
Fixed	dclick in non picture windows doesn't work
Fixed	deprecate \$volumeep, \$volume is now in percent
Fixed	\$volume \$volumeeb is not updated correctly
Fixed	editing link in Link Warning box is ignored
Fixed	"disconnected" is shown twice in the server window
Fixed	DCC Chat is not working properly
Fixed	\$ial is not always updated from /who
Fixed	\$chr(0) should return \$null
Fixed	if topicbox ends with a link, hovering free space after shows invalid link cursor
Fixed	\\ and // operators in scripts can cause a crash and returns wrong result
Fixed	\$site returns wrong hostname
Fixed	sysinfo commands should be ignored in server window
Fixed	some system info identifiers are missing from the docs
Fixed	\$!identifier is sometimes not evaluated correctly
Fixed	Commands -> Set Away -> OFF isn't working
Fixed	/ should be stripped when renaming a script
Fixed	\$script should show full path
Fixed	\$nick() non default channel prefixes are ignored
Fixed	\$prefix is reversed
Fixed	\$nick() sometimes crashes
Fixed	big text lines is not wrapped correctly
Fixed	negative numbers should be allowed for channel limit in channel editor
Fixed	\$query(nick).addr returns @ if there is no host/ident
Fixed	dock panel headers should be hidden when "Lock Bars" is enabled
Fixed	dock panel headers should not be moveable by right clicks
Fixed	toolbar icon commands should be parsed as scripts
Fixed	\$window().dw \$window().dh returns wrong size for picture windows
Fixed	\$date \$adate \$time is missing leading zero
Fixed	\$modes in channel titles is missing mode parameters
Fixed	channel limit is not correctly parsed on channel join

Fixed	\$chan(#).mode is missing mode parameters
Fixed	channel editor crashes with long user limit
Fixed	MAXLIST is not parsed correctly on some servers
Fixed	stop format tag doesn't work in topicbox
Fixed	\$duration does not work with double numbers
Fixed	/uptime \$uptime(system) sometimes returns the wrong duration
Fixed	\$ticks does not return the correct number
Fixed	manually typing a font/size sometimes crashes the font browser
Fixed	/timers off doesn't work
Fixed	ignoring color codes in part quit messages doesn't work
Fixed	/ignore /dns quiet flag doesn't work
Fixed	\$timestamp \$logstamp adds a trailing whitespace
Fixed	log filename missing first char for private windows if custom name is used
Fixed	\$chan is missing in event INVITE
Fixed	colors in on TEXT event should be stripped if ignore -k is matched
Fixed	/timer should be associated with current window
Fixed	/dns shows a empty line on unresolved
Fixed	brackets in scripts should not be evaluated if there is a space
Fixed	some commands fails on servers with multiple channel prefixes
Fixed	moving a dockpanel in front of another panel doesn't work
Fixed	# is not correctly parsed in \$identifier(#)
Fixed	\$\$identifier not working for all identifiers
Fixed	\$query should only count private windows on current server
Fixed	local identifiers doesn't work in /scon and /scid
Fixed	IME popups closes when typing in inputbox/topicbox/script editor
Fixed	allow selecting/copying topic in channel editor if the textbox is disabled
Fixed	unread line marker should by default only be visible for channel/priv/server windows
Fixed	/aline should scroll to bottom if scroll pos was at bottom
Fixed	\$nick().color should return 1 if random nick colors are disabled
Fixed	shift + tab should not select the newline in input box/script editor
Fixed	automatically set back should only trigger if a non command is typed
Fixed	away system should work per server instead of globally
Fixed	toggle icons in sidebar doesn't work
Fixed	raw 404 should be shown in channel window if existss
Fixed	/amsg and /ame should send only one PRIVMSG with target channels separated by ","
Fixed	/back should not set back If user is not away
Fixed	pressing enter in rawlog search box should perform a search
Fixed	right click X in dock panel shouldn't close it
Fixed	away timer should be reset after hibernate
Fixed	matchtext in events should be parsed for identifiers/variables if it starts with \$ or %

Fixed	/join #chan should rejoin a channel if the window exists but not joined
Fixed	all colors/fonts tags should be reset in topic/kick/part/quit messages
Fixed	nick colors are sometimes not inverted correctly
Fixed	theme manager window size/position is not saved correctly
Fixed	\$\$! should show result from \$input
Fixed	/google and /pgoogle should detect and read the proper encoding
Fixed	has write access check fails on some machines
Fixed	\$awaytime should be reset after raw 306
Fixed	\$left \$progress \$duration \$length identifiers sometimes gives wrong results
Fixed	<tab> on empty inputbox should cycle all nicks in channel
Fixed	/wsearch /wselect not always working correctly with mediamonkey player
Fixed	whitespaces should be allowed in tabcomplete nicks
Fixed	default/random quit message is parsed wrongly
Fixed	on CTCP crashes
Fixed	line numbers in scripts editor is too slow
Fixed	quick save server dosen't save channels with passwords correctly
Fixed	on TABCOMP is not triggered on empty editbox
Fixed	/ignore -<flag> with no nick/address should show a error
Fixed	menu scripts ignores #groups
Fixed	duplicate mouse events in picture windows causes crash
Fixed	closing a channel instead of parting wont trigger part sound
Fixed	\$bitrate is missing for media monkey player
Fixed	a crash when using some windows themes
Fixed	ctrl + l should scroll to unread line marker
Fixed	allow ctrl + z undo when using /editbox
Fixed	reconnect shows "disconnected" in all windows, not just server window
Fixed	/server crashes with some invalid parameters
Fixed	if "allow only one copy" and "minimize to tray" is enabled, main window can't be restored
Fixed	select the proper icon size when using favicons or custom icons
Fixed	all main icons should be updated immediatly when changing icon
Fixed	scripts manager is not saved/restored properly
Fixed	changing encoding should only update the encoding in the serverlist (not channels)

Fixed	remove every nonwhite space after last closed parenthesis in

	scripts
Fixed	allow and for escaping brackets in scripts
Fixed	maximize button should be disabled in quick connect
Fixed	script files with [script] sections should be loaded as ini files
Fixed	/slap \$1 is not correct in the default slap

[_sort_asc.png](#)

AdiIRC 1.9.1 - 30-07-2013

Added	proxy/socks support
Added	\$osinstalldate variable
Added	exabyte to all byte calculations
Added	option to get favicon from server url
Added	option to set default and individual window icons
Added	\$date variable for logging
Added	"Save All" menu/shortcut in script editor
Added	option to enable/disable formatting links and various formatting improvements
Added	<number> <delay> flags for /beep
Added	ability to select multiple items in nickcolor list
Added	save/restore dock position of menubar/toolbar/channelbar
Added	rightclicking window title will show the menubar menu if menubar is hidden
Added	new sound options
Added	-n -p parameters for /run and set proper working directory
Added	unlimited connection retries if retries is set to 0
Added	option to set custom background image per window
Added	option to use a global up/down input history
Added	missing \$window properties
Added	irc6:// ircs6:// support
Added	option to enable/disable regain nick
Added	missing b parameter for binvars in \$encode
Added	LOGON event
Added	/bset -c chop parameter
Added	-an parameters for /clipboard, also allow empty params to clear clipboard
Added	raw 328 link support
Added	menus in custom windows with menu @name
Added	add /dline [c] <@name> <N[-N2]>
Added	close button for dock panels
Added	ignore list GUI
Fixed	edit commands should be named edit aliases
Fixed	/slaps should be parsed as scripts
Fixed	allow empty messages in events e.g notice
Fixed	\$line sometimes returns empty string incorrectly

Fixed	\$script should return relative path
Fixed	/loadbuf <name> <file> not parsed correctly
Fixed	/sline doesn't work on users with channel modes
Fixed	event HOTLINK is not triggered correctly
Fixed	\$active and \$target doesn't work with custom windows
Fixed	hash tables should be case insensitive
Fixed	\$sha1/\$md5 doesn't work with &binvars
Fixed	/bset sometimes crashes
Fixed	parsing {} brackets sometimes fails
Fixed	graphic glitch offset on text with background colors
Fixed	graphic glitch with diacritical characters
Fixed	/fwrite -b &bin doesn't work
Fixed	all windows regardless of type should be saved the same way
Fixed	/bw should show a error message if no network adapter is set
Fixed	/bset <N> is one byte off when inserting at pos <N>
Fixed	if (<int> isnum <int>) not working
Fixed	a random crash on startup
Fixed	client messages should be threatred as system messages not channel messages
Fixed	/toolbar -u doesn't refresh toolbar image
Fixed	\$width and \$height reports wrong value
Fixed	event ACTIVE should be fired after the activation have taken place
Fixed	random nick color option should be in Options -> Colors
Fixed	clicking edit toolbar while edit toolbar is already open causes a crash
Fixed	event TABCOMP should fill \$1- with the tabcompleted text
Fixed	\$style(X) was not always parsed correctly
Fixed	\$1 in menus should be filled with nick or channel
Fixed	ctrl + z undo when tabcompleting nicks/inserting format/color tags in inputbox didn't work
Fixed	minor drawing glitch in the sidebar on certain fonts
Fixed	\$ial should be updated whenever 311 is encountered
Fixed	bans are not removed from channel editor if multiple bans are in the same MODE
Fixed	event INPUT triggers on all @custom windows instead of the matched one
Fixed	nickcolors/textcolors are sometimes not inverted correctly
Fixed	channels with "&&" displays incorrectly in sidebar
Fixed	raw 486 and 460 should use settings from Events -> Errors
Fixed	\$ial should only check current server
Fixed	/window -e/-E should add inputbox
Fixed	\$chan(#invalidchan, 0) should return \$null instead of 0
Fixed	\$scon and \$scid couldn't use local identifiers
Fixed	/set fails to parse %vars if first parameter is a identifier
Fixed	\$() is not executed inside /var and [] evaluation

Fixed	should only capture first match if /g is not defined in \$regsub and \$regsubex
Fixed	\$base should convert both lowercase/uppercase characters
Fixed	Goto Line 0 in script editor caused a crash
Fixed	/slap sometimes caused a crash
Fixed	reconnect server retries should be reset on manual disconnect
Fixed	/paths to show both the install path and the config path
Fixed	raw 330 should be parsed as whois
Fixed	shortcut keys to add bold/italic/underline/color in sysinfo editor didn't work
Fixed	/sysinfo /uptime was sometimes slow
Fixed	/diskinfo <drive> didn't work
Fixed	copying text on asian locale didn't work
Fixed	update timer sometimes causes a crash on startup
Fixed	\$gmt \$date \$actime to work properly with timezones
Fixed	<tab> should add 2 spaces instead of <tab> in script editor
Fixed	*.mts and *.mrc should be filtered in script manager/theme editor
Fixed	options menu shortcut should be Alt+O
Fixed	some channel bans didn't show up
Fixed	channel editor should be enabled for half ops
Fixed	":" should be stripped from on RAW 302 and 340
Fixed	sidebar userlist should be off by default
Fixed	issue with disappearing dockpanels
Fixed	menubar icon is sometimes the wrong icon
Fixed	reset usermenu width if its changed
Fixed	animateicon in system tray wasn't working
Fixed	cut of the text in channelbar if the text is wider than the button
Fixed	linenumber for the last line in script editor was missing
Fixed	/viewlog with no parameters should open logfile on current window

[_sort_asc.png](#)

AdiIRC 1.9.0 - 18-05-2013

UTF-8	is now the default encoding
Added	mIRC scripting support - See dev.adiirc.com wiki for more info
Added	MTS themes support
Added	options for default window sizes
Added	undockable activity panel for private messages
Added	undockable activity panel for channel messages
Added	undockable activity panel for server messages
Added	undockable activity panel for notices
Added	undockable activity panel for url catcher
Added	undockable activity panel for notify status
Added	undockable activity panel for highlights

	Added	undockable activity panel for transfers
	Added	ircs:// links support
	Added	+port for ssl connections in quick connect and serverlist
	Added	uhnames support
	Added	option to start AdilIRC minimized
	Added	%ord variable for suffixing in days (18th)
	Added	%t %tt variables for PM AM
	Added	option to hide the menubar and use ALT to bring it back
	Added	perform option for quick connect
	Added	drag drop support to install plugins/themes/scripts
	Added	new toolbox where text can be selected

	Added	option to use serverlist labels as "network name"
	Added	option to show/show sticky/hide topicbox
	Added	tooltips for server history menu
	Removed	restore logs limit
	File	file paths are now relative for portability
	Topicbox	is by default one line and expanded when focused
	Pressing	shift when starting AdilIRC will bypass any autoconnect servers
	All	window size/positions are now saved/restored
	Complete	rewrite of themanager
	Complete	rewrite of script editor
	Changed	the way channelbar items resizes
	Improved	all statusbar menus and events
	Improved	search functions for multiline text in channels
	Improved	logs/logsviewer
	Improved	update system, check every day/week/month
	Fixed	some tabcomplete issues
	Fixed	several issues with background images
	Fixed	some issues with sidebar and dual screen

Fixed	DCC transfers was slow
Fixed	logging on servers without a network name failed
Fixed	several issues with mouse clicks in sidebar
Fixed	several issues related to links in channels
Fixed	an issue where tray icon would dissappear
Fixed	an issue where sidebar would be blink/flash
Fixed	an issue where scrolling text was slow
Fixed	an issue with tracking nick changes in query windows
Fixed	an issue with foobar2000 now playing
Fixed	an issue where winamp now playing stoppped working
Fixed	/ignore crashes if no ignore file exists
Fixed	associate irc:// links was not working as non admin
Fixed	UserMessage and SendData are not sent to plugins
Fixed	a issue with saving "Show in active" settings
Fixed	a issue where DCC transfers stopped at 99%

[_ sort_asc.png](#)

AdiIRC 1.8.10 - 13-08-2012

Added	a complete rewrite of scripting and tons of new functions, see scripting wiki for more info
Added	new font dialog and ability to use almost any font
Added	message indent option
Added	message maxbuffer lines option
Added	message doublespacing option
Added	message unread line marker option
Added	message option to autoscroll to bottom when typing
Added	search box to rawlog and other improvments
Added	better /ignore functions, see wiki for more info
Added	/notify and View -> Notify functions
Added	/timer command
Added	option to singleclick links
Added	doubleclicking a query window will send a WHOIS
Added	DCC Chat support
Added	DCC Resume support and ETA in transfer window
Added	several improvments to the Option window, allowing resize and scrolling
