

AdiIRC - Notify - # 10

Added in 1.8.10

/notify -hlrs <on|off|nickname> [network] [note]

Edit your notify list, you will get a alert whenever a nick on your notify list goes online/offline.

See also [\\$notify](#), [on NOTIFY](#), [on UNOTIFY](#).

Switches

- h = Hides the [Notify monitor panel](#).
- l = List nicks on notify list.
- n = Indicate [networks] is defined.
- r = Remove nick from notify list. (nickname can be a [wildcard](#), **AdiIRC only**)
- s = Shows the [Notify monitor panel](#).

Parameters

- <on|off|nickname> - Turns notify on or off or edit's the nick entry.
- [network] - The network name or address to enable the notify.
- [note] - Small note for this nick.

Example

```
; Add 'Nick' to the Notify list.  
/notify Nick
```

```
; Print the Notify list.  
/notify -l
```

```
; Remove 'Nick' from the Notify list  
/notify -r Nick
```
