

AdiIRC - Omsg - # 4

Added in 1.9.2

/omsg [#channel] <message>

Sends a private message to all operators in a channel.

If channel is not defined, current channel will be used.

You must be a channel operator to use this command.

See also [/describe](#), [/me](#), [/ame](#), [/msg](#), [/nmsg](#), [/notice](#), [/onotice](#).

Parameters

[#channel] - Channel where the operators are located.

<message> - Messages to send.

Example

```
; Sends "Hai operators!" to all operators on #channel.  
/omsg #channel Hai operators!
```
