

## AdiIRC - Pgoogle - # 7

Added in 1.5

**/pgoogle [-nN] [-t] [-d] [window] <text>**

Searches google for text and sends the output to current window or [window].

See also [/google](#).

Switches can not be combined.

### Switches

- t - Specifies a 'window' is defined.
- nN - Show N results.
- d - Search using [DuckDuckGo](#) instead of Google.

### Parameters

- [window] - Window to show the result.
- <text> - Text to search.

### Example

```
; Search for 'Star Wars' and print 5 results.  
/pgoogle -n5 Star wars
```

```
; Search for 'Natalie Portman' and send the result to #channel.  
/pgoogle -t #channel Natalie Portman
```
