

AdiIRC - Priv - # 2

Added in 1.9.0

/priv [-nx] <nick> [message]

Sends an message to a nick.

If no message is defined, it will open a empty private window with nick or if window exist, give it focus.

Same as [/query](#).

Switches

- n - Open window minimized.
- x - Open window maximized.

Parameters

<nick> - Nick to message.

[message] - Message to send to nick.

Example

```
;Open a private window with Nick.  
/priv Nick
```

```
;Open a private window with Nick and send message "Hello world".  
/priv Nick Hello world
```
