

## AdiIRC - Remove - # 1

*Added in 1.9.0*

**/remove [-b] <filename>**

Deletes the specified file.

### Switches

-b - Move the file to the recycle bin instead of deleting it.

### Parameters

<filename> - File to remove.

### Example

```
;Create and write to a file.  
/write test.txt Hello There
```

```
;Remove the file.  
/remove test.txt
```
