

## AdiIRC - Return - # 1

*Added in 1.9.0*

**/return [text]**

Halts a currently executing script and allows the calling routine to continue processing.

### Parameters

[text] - Text to return.

### Example

```
alias example {  
    ;Return the addition of two values.  
    /echo -a $add(2, 5)  
}  
;Add two numbers.  
alias add {  
    /return $calc($1 + $2)  
}
```
