

## AdiIRC - Rlevel - # 1

*Added in 1.9.7*

**/rlevel [-r] <level(s)>**

Removes access levels from all matches users.

If a user has no more levels left then the user is removed.

### Switches

-r - Any matching levels are removed, not just general access level.

### Parameters

<level(s)> . Level(s) to remove.

### Example

```
; Remove all users with general access level 1 or 2  
/rlevel 1,2
```

```
; Remove all users with access level =1 and =2  
/rlevel =1,2
```

```
; Remove all users with access level =1,1,=2 and =2  
/rlevel -r 1,2
```
