

Serverlist Servers

In the servers tab you can add/edit/remove hostnames and ports which this network should connect to.

AdiIRC will try each hostname in order from top to bottom.

Only one hostname and one port/port range can be added per entry.

servers.png

Ports

Syntax: [+]*]N-M.

+ Prefix indicate the port(s) are [SSL/TLS](#) port(s).

- Prefix indicates the port(s) are [STARTTLS](#) port(s).

Ports can be a range using N-M, e.g 6667-6669.

Add

Opens up the [add server dialog](#).

Edit

Opens up the [edit server dialog](#).

Remove

Removes the selected server(s) from the servers tab.

Up

Moves the selected server(s) higher up in the serverlist.

Down

Moves the selected server(s) lower down in the serverlist.
