

AdiIRC - Sleep - # 2

Added in 1.8.3

/sleep <N> <command>

Execute a command after N seconds, can be used to delay channel joins while waiting for NickServ Auth.

Parameters

<N> - Seconds to delay.

<command> - Command to execute after delay. (Must start with a /)

Example

```
;Delay 5 seconds, then join #channell1 and #channel2  
/sleep 5 /join #channell1,#channel2
```
