

Spellcheck

AdiIRC includes spellcheck support as of 1.9.6 beta 2014/10/25 using [Nhunspell](#).

Steps to enable spellcheck:

1. Rightclick the [Editbox](#) and select the **Check Spelling** menu, this will install the necessary dll's.
2. Restart AdiIRC.
3. Rightclick the [Editbox](#) and choose **Default Languages** -> Add Dictionaries, download the dictionaries you want to install.
4. Rightclick the [Editbox](#) and choose **Default Languages** -> Language you want to use.

Different languages per channel

You can set a different language per channel/window by rightclicking the [Editbox](#) and choose **Languages** instead of **Default Languages**, the settings are saved/restored across sessions.

Disable spellchecking per channel

Rightclicking the [Editbox](#) and choose **Languages** then select **Off** disables spellchecking for the channel.

Downloadable Dictionaries:
