

Switchbar Options

See also [/switchbar](#), [Switchbar](#).

Show network name

Shows or hides the network name for this network in the status tab, if hidden, the text will be just "Status"

Show nick name

Shows or hides the nick name for this network in the status tab.

Show Icons

Shows or hides the window icons.

Show tooltips

If enabled, shows tooltips when hovering a window in the [Switchbar](#).

Custom tooltips can be set in [Options](#) -> [Windows](#).

Scroll mouse-wheel to change windows

If enabled, hovering the [Switchbar](#) and using the mouse-wheel will change the active window, otherwise SHIFT must be pressed.

Lines

Selects how many lines should be visible in the [Switchbar](#).

If "Auto" is selected and "Lock bars" is on, [Switchbar](#) will fit as many tabs as possible then make new lines as needed.

If "Auto" is selected and "Lock bars" is off, [Switchbar](#) will fit as many tabs as possible then show a overflow button at the end of the [Switchbar](#) with the rest of the tabs.

This is a .NET limitation when grip style is visible.

If "1" is selected, [Switchbar](#) fill fit as many tabs as possible with a smaller minimum size.

Size

Sets the preferred maximum size of a tab, if size is set to 0, [Switchbar](#) will make the tabs as large as possible.

Minimum Size

Sets the proffered minimum size of a tab, if size is set to 0, [Switchbar](#) will make tabs resize to fit as good as possible.
