

Tips Options

See also [/tips](#), [\\$tips](#).

Enable tips

Enable or disable Tips.

Note: highlight tips is set on the highlight word in the highlight options.

Use Windows Toast Notifications

If enabled, AdiIRC will show Tips using [Windows Toast Notifications](#) instead of the custom Tips.

Hide tips when fullscreen application is active

If enabled, Tips will be hidden if a fullscreen application such as a movie or a game is active.

Only show if AdiIRC is not focused

If enabled, Tips will be hidden if AdiIRC is focused.

Animate tips

If enabled, tips will be faded in/out, otherwise they will be shown/hidden instantly.

Queue [X] tips

Maximum number of tips to queue/show in the same Tip window.

Show for [X] secs

Show a Tip window for [X] seconds.

If set to 0, Tips will be "sticky" and have to be manually closed or the main window activated.

Show on monitor [N]

If set to **Auto**, Tips will be shown on the same monitor as the main window.

If set to **Default**, Tips will be shown on the default monitor.

If set to **N**, Tips will be shown on Nth monitor.
