- t - Update tooltip.
- p - Update picfile.
- l - Update alias.
- o - Update popupfile.
- f - TODO
- gN - Sets the button alignment, 0 = left, 1 = right. (AdiIRC only)

### Parameters

[on|off] - Enables/Disables Toolbar, use [\\$toolbar](#) to determine toolbar status.

[N] - Button position to modify.

<name/N> - Name or position of button to modify.

<tooltip> - Tooltip for the button.

<picfile|@> - Icon/Image file to use for the button or pic window name.

[x y w h] - Position and size of the image/bitmap to use. (not used for icons)

[/alias] - Alias command to add to the button.

[popfile|@] - popfile = TODO, @name pic window name.

### Example

```
; Add a button.
```

```
/toolbar -a mybutton "My button tooltip" "c:\icons\myicon.png" "/mycommand"
```

```
; Change the icon.
```

```
/toolbar -p mybutton "c:\icons\myicon2.png"
```

```
; Change the alias.
```

```
/toolbar -l mybutton /mycommand2
```

```
; Remove a button.
```

```
/toolbar -d mybutton
```

### Default buttons

```
tsb1 = Disconnected
```

```
tsb26 = Connecting
```

```
tsb27 = Connected
```

tsb2 = Serverlist
