

Toolbar

The toolbar allows performing various actions based on clicking icons.

See also [/toolbar](#), [\\$toolbar](#).

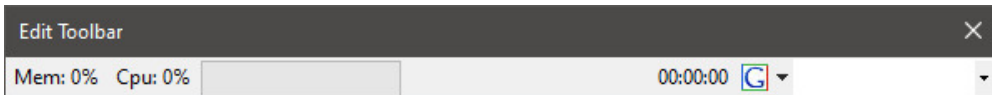

Note: right-clicking some icons gives quick access to more features such as server history/favorites and channel favorites.

Hiding the Toolbar

The Toolbar can be hidden by clicking [Menubar](#) -> View -> Toolbar or by typing [/toolbar](#) off or by changing [Options](#) -> [Windows](#) -> [Enable Toolbar](#) or by right-clicking the Toolbar and then clicking **Hide Toolbar**.

Modifying the Toolbar

The [/toolbar](#) command can be used to add/edit/remove any toolbar icon. To have any changes persistent, put the commands in a [on START](#) script.

There is also a graphical drag/drop editor for the built-in icons which can be accessed by right-clicking in the Toolbar and clicking **Customize**.

Media player icons

Media player icons are only visible when the [media player](#) is set to Winamp/Media Monkey/iTunes or Spotify.

Default icons

The default icons can be changed in [Options](#) -> [Icons](#).

Toolbar position

The Toolbar can be moved to the top/bottom/left/right of the main window by right-clicking the Toolbar then clicking **Position**.

Locking bars

[Menubar/Toolbar/Switchbar/Treebar](#) can be locked so they can't be moved by right-clicking any bar and then click **Lock Bars**.

Locking bars also removes the header from the [Monitor Panels](#).

Colors

The Toolbar background color can be set in [Options](#) -> [Colors](#).

Note: [Override Windows theme colors](#) must be enabled.

Font

The font can be changed in [Options](#) -> [Fonts & Sizes](#) or by using the [/font](#) command.

Background image

A background image for the Toolbar can be set in [Options](#) -> [Backgrounds](#) or by using the [/background](#) command.
