

Treebar Options

See also [/treebar](#).

Notify List

If set to "All", all notify nicks will be visible in the Treebar, if set to "Online", only online notify nicks will be visible, otherwise no nicks will be visible.

See also [/notify](#), [\\$notify](#), [Notify Options](#).

Close Icon

If set to "Off", no close icon will be visible.

If set to "On hovering", a close icon will be visible when hovering a Treebar node associated with a window.

If set to "Always", all Treebar nodes associated with a window will have a close icon.

If set to "Active", The current selected Treebar node associated with a window will have a close icon.

The icon can be changed from [Options](#) -> [Icons](#).

Spacing

Sets the number of pixel between each node in the Treebar. (Divided by 2)

Strip status prefix

If enabled, prefix/channel mode characters (@%+) will now be drawn in the Treebar Nicklist.

Your prefix follows status color

If enabled, your prefix/channel mode color will follow the global prefix/channel mode color instead of "Your" color.

Enabled:

@Nick

Disabled:

@Nick

Nicklist follows selected channel

If enabled, the Treebar Nicklist will be collapsed for all channels except the active channel.

Show Nicklist

Enables or disables the Treebar Nicklist.

Show top to bottom scrollbar

Enables or disables the vertical scrollbar.

Show left to right scrollbar

Enables or disables the horizontal scrollbar.

Use Folders

Enables or disables the Treebar folder groups.

Can also be enabled/disabled from the Treebar right click menu.

Show Count

Enables or disables the Treebar folder groups count.

Can also be enabled/disabled from the Treebar right click menu.

Show window icons

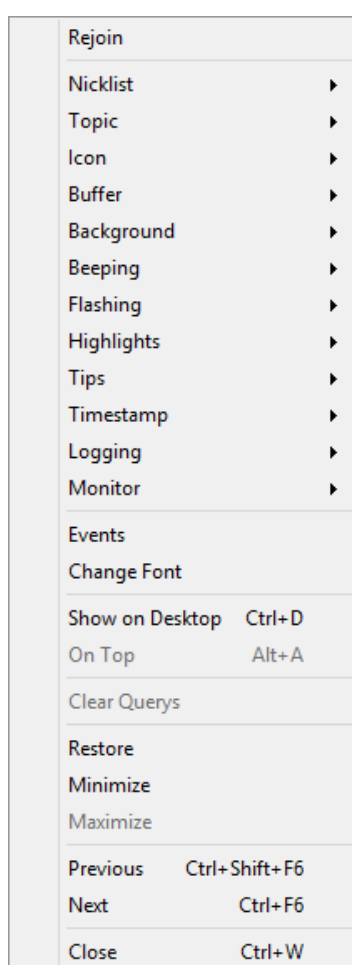

Enables or disables the window icons in the Treebar.

Window icon can be changed in [Options](#) -> [Icons](#).

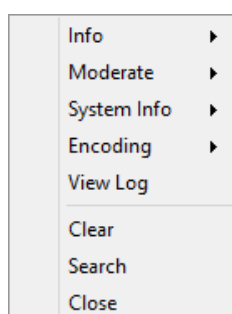

Use system menu

If enabled, right clicking a window in Treebar will show the system menu, otherwise it will show the [scripted window menu](#).

Enabled:

Disabled:

Scroll mouse-wheel to change windows

If enabled, hovering the Treebar and using the mouse-wheel will change the active window, otherwise SHIFT must be pressed.

Show nick name

Shows the current nick on the Server node.

Show network name

Shows the current network name on the Server node.

Use flat Treebar

If enabled, the Treebar will no longer be nested and all nodes will be shown in the same horizontal position.

Show arrow icons

Enables or disables the arrow icons in the Treebar.

Show tooltips

If enabled, shows tooltips when hovering a window in the Treebar.

Custom tooltips can be set in [Options](#) -> [Windows](#) or through the [/titlebar](#) command.

Show highlights on collapsed networks

If enabled, and a Treebar network node is collapsed, it will show new message/highlight color (and unread count if enabled) for any associated channel/private window on the network node.

Collapse other servers except active

If enabled, other Treebar server nodes except the one belonging to the current active window will be collapsed.

Show unread count

Enables or disables the Treebar unread messages count.

Can also be enabled/disabled from the Treebar right click menu.

Only show unread messages count

If enabled, will only show actual messages (excluding system messages such as join/part etc) in the unread messages count.

Show unread messages based on scroll position

If enabled, messages below the current scrollbar position will be marked as unread.
