

## AdiIRC - Uwho - # 5

*Added in 2.2*

**/uwho [nick] [nick]**

Performs a [/whois](#) on the specified nickname to look up their server information and then displays it in the [Whois](#) section of the [Address book](#).

*See also [/whois](#), [/abook](#).*

### Parameters

[nick] - The nick to look up.

[nick] - On some servers nick needs to be specified twice to get all the information.

### Example

```
; Perform a whois lookup on the nick 'nick'.  
/uwho nick
```
