

## AdiIRC - Viewlog - # 5

*Added in 1.9.0*

**/viewlog [-nN] [filename]**

Displays a log file in the [Logs Viewer](#).

If no filename is defined, current window's logfile will be used.

*Same as [/logview](#).*

### **Switches**

-nN - Scroll to the Nth line in the log file.

### **Parameters**

<filename> - Log file to view.
