

## AdiIRC - Vmsg - # 2

*Added in 4.0*

**/vmsg [#channel] <message>**

Sends a private message to all voiced users in a channel.

If channel is not defined, current channel will be used.

You must be a voiced user to use this command.

See also [/describe](#), [/me](#), [/ame](#), [/msg](#), [/nmsg](#), [/notice](#), [/onnotice](#), [/vnotice](#).

### Parameters

[#channel] - Channel where the voiced users are located.

<message> - Messages to send.

### Example

```
; Sends "Hello voiced users" to all voiced users on #channel.  
/vmsg #channel Hello voiced users
```
